## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It appears the claimed invention is based on the schematic circuit diagram of Figure 2. However, the circuit operations are not clearly describe in the specification in such a way as to enable one skilled in the art to make and/or use the invention.

There is no language in the specification indicates which element(s) called "a test instrument", "peak-value from a signal", "an estimate tolerance", and further "amplifier" in line 7.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant invention called for "trace-following power amplifier", but it is not clear what is meant by "trance-following power amplifier".

Claim 1, line 2, discloses "an amplifier" which may be read as amplifier (3) of Figure 1. However, claim 1, line 7, further discloses another "an amplifier". It is not clear which "amplifier" is intended in line 7.

Claim 1, lines 9-10, it is not clear which "said amplifier" is intended.
